

HURT AFTER ABORTION

Did you have physical complications following an abortion?

Your experience matters and you deserve to be heard

You Have Rights:

EQUAL PROTECTION - The 14th amendment to the US Constitution affords us the right to equal protection under the law. Women seeking abortions deserve the same standard of care and protection as a person seeking any other medical procedure.

INFORMED CONSENT - You have a right to know and understand the information concerning a medical treatment or procedure. This should include all possible risks, benefits, and alternatives before giving your consent.

ACCESS - The right to see and get a copy of your medical records is fundamental in your ability to participate in your own care and healing.

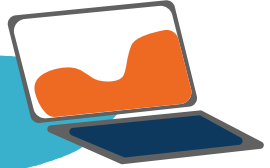

Hurt After Abortion
A Project of ProLove Ministries
proloveministries.org

We want to help you get the justice and healing you deserve.

Communicate:

Fill out the contact form on our website as thoroughly as possible.

Assess:

We will schedule an intake, listen to your experience + transcribe notes for our legal team.

Access:

We will work together to obtain your medical records if they are available.

Legal Assistance:

We send your case to our legal team or review. If the team decides to take your case, the law office will contact you + their services will customarily be no charge.

Healing:

We can refer you to an abortion recovery program to process your experience + be restored from the impact of abortion on your life.

Just because abortion is called "normal" doesn't mean it is okay, doesn't mean it is healthy, and doesn't mean it did not hurt you.
